

ABHIJEET DEY

+91 70610 01694 | deyabhijeet2003@gmail.com | LinkedIn | GitHub | Bangalore

PROFESSIONAL SUMMARY

MCA student (Batch 2027) at VIT Bhopal with practical experience in full-stack web development using **React.js**, **Python**, **MongoDB**, **REST APIs**, and **Git/GitHub**. Experienced in building responsive frontends, backend APIs, and database-integrated applications through internship and independent software projects. Quick to learn new technologies and contribute effectively within engineering teams.

EDUCATION

Master of Computer Applications (MCA) | VIT Bhopal University 2025 – 2027
CGPA: **7.19 / 10** | No Active Backlogs | Batch 2027

Bachelor of Computer Applications – Data Analytics | Kristu Jayanti College, Bangalore 2022 – 2025
CGPA: **7.85 / 10** | Aggregate: **78.5%**

TECHNICAL SKILLS

Languages	Python, JavaScript, HTML, CSS, SQL
Frontend	React.js , Responsive UI, Material UI (Basics), Tailwind CSS, HTML5, CSS3
Backend	Python , FastAPI, Node.js, Express.js, REST APIs
Databases	MongoDB , Firebase/Firestore, MySQL, PostgreSQL, SQL
Cloud & Deploy	Firebase, Vercel, AWS (Basics)
Tools	Git , GitHub , Postman, VS Code, Jupyter Notebook

EXPERIENCE

Full Stack Developer Intern | Bangalore June 2024 – July 2024

- Developed a **React.js** frontend for visualization of road network data across North-Eastern India; integrated geospatial datasets and built interactive UI components to display road classifications.
- Built and integrated **REST APIs** using Node.js and Express.js with a **MongoDB** backend; optimized data pipelines reducing fetch time by **15%** and improving performance by **20%**.
- Contributed to backend logic for data filtering and route classification; wrote reusable API handlers and collaborated using **Git/GitHub** throughout the delivery cycle.

Independent Software Developer | MEMORA | GitHub 2025 – Present

- Built and deployed multiple web applications alongside MCA studies – including a software showcase site, a café concept, and a gifting application – using **React.js**, JavaScript, **Firebase/Firestore**, and **Git/GitHub**.
- Implemented **Firebase Authentication** and real-time **Firestore** database integration; built an admin dashboard for managing contact submissions and application data.
- Maintained a live production site at memoralabs.online; handled **Vercel** deployment, domain configuration, production debugging, and ongoing feature updates.

PROJECTS

Multi-Agent Research Platform GitHub | 2026

- Developed a multi-agent research platform using **React**, **TypeScript**, and **Tailwind CSS** to support research paper discovery, AI summarization, paper comparison, and report generation.
- Designed an integrated research workflow with specialized AI agents and PDF-based research interaction for streamlined knowledge discovery and analysis.

European Bank Customer Analytics GitHub | 2026

- Analyzed banking customer behavior and product engagement using **Python**, **Pandas**, and exploratory data analysis to identify customer and retention insights.
- Built and deployed an interactive **Streamlit** analytics dashboard with data visualizations using **Matplotlib** for business-oriented analysis.

ASG Airlines – End-to-End Analytics Dashboard GitHub | 2026

- Prepared and analyzed airline data using **Python** and **Jupyter Notebook** to derive insights across flights, airlines, routes, duration, and overnight operations.
- Developed an interactive **Power BI** dashboard with KPI-driven visualizations for analyzing flight operations and route performance.

House Price Prediction GitHub | 2026

- Built an end-to-end **Python** machine learning pipeline covering EDA, feature engineering, Linear Regression, Random Forest, and R^2 /RMSE model evaluation.
- Applied feature importance analysis and **GridSearchCV** hyperparameter tuning to improve Random Forest model performance and identify key pricing factors.

CERTIFICATIONS

Google Advanced Data Analytics – Google | **Machine Learning Specialization** – Coursera

Data Analytics with Python – Coursera/NPTEL | **SQL for Data Science** – Coursera
