

ABHIJEET DEY

Data Analyst | ML Engineer | AI/ML | MCA 2027

Bangalore, Karnataka | +91 70610 01694 | deyabhijeet2003@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Analytics and AI/ML professional pursuing MCA (Batch 2027) at VIT Bhopal (CGPA: 8.00). Experienced in end-to-end ML pipelines, EDA, feature engineering, and statistical modelling using Python, Pandas, NumPy, and Scikit-learn. Skilled in deriving actionable insights from structured datasets. Seeking roles in Data Analytics, Machine Learning Engineering, or AI/ML development.

EDUCATION

Master of Computer Applications (MCA) | VIT Bhopal University, Bhopal 2025 – 2027
CGPA: 8.00 / 10 | No Active Backlogs

Bachelor of Computer Applications – Data Analytics | Kristu Jayanti College (Autonomous), Bangalore 2022 – 2025
CGPA: 7.85 / 10 | Aggregate: 78.5%

Class XII, CBSE | Gurunank Hr. Sec. School, Ranchi | 80.8% 2022

Class X, ICSE | St. Francis School, Ranchi | 82.6% 2020

TECHNICAL SKILLS

Core ML/AI	Supervised & Unsupervised Learning, Regression, Classification, Clustering, Random Forest, Decision Trees, Model Evaluation, Hyperparameter Tuning
Data Analytics	Pandas, NumPy, EDA , Data Wrangling, Feature Engineering, Statistical Analysis
Visualization	Matplotlib, Seaborn, Plotly, Correlation Heatmaps
AI Frameworks	Scikit-learn , TensorFlow (Basics), NLP Basics, Prompt Engineering
Languages	Python , SQL, JavaScript, Java
Databases	MySQL, PostgreSQL, MongoDB, Query Optimization
Tools	Jupyter Notebook, Git, GitHub, VS Code, Google Colab, Postman
CS Foundations	DSA, DBMS, Statistics, Probability, Linear Algebra (Basics), OOP

WORK EXPERIENCE

Full Stack Developer Intern | Elena Geo System, Bangalore June 2024 – July 2024

- Analysed geospatial datasets and engineered data pipelines for real-time road network visualization; applied query optimization reducing data fetch time by **15%**.
- Identified performance bottlenecks through log analysis, improving system performance by **20%** and page load time by **25%**.
- Tech:** Python, Node.js, MongoDB, SQL, JavaScript, Git

PROJECTS

House Price Prediction *Regression, EDA, Feature Engineering* Dec 2024 [GitHub](#)

- Built end-to-end ML pipeline (Linear Regression, Random Forest) on **1000+ records**: EDA, feature engineering, hyperparameter tuning, and evaluation via R^2 and RMSE; visualized feature importance and correlation heatmaps.
- Tech:** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Jupyter Notebook

Financial Data Analytics Dashboard *Python, SQL, Pandas, Seaborn* Feb 2026 [GitHub](#)

- Processed financial transaction data using Pandas and SQL; performed aggregation, time-series trend analysis, and anomaly detection; generated Seaborn dashboards to surface actionable business insights.
- Tech:** Python, Pandas, NumPy, SQL, Matplotlib, Seaborn, Jupyter Notebook

HR Workflow Designer *React, TypeScript, DAG Algorithms* Apr 2026 [GitHub](#)

- Implemented topological-sort simulation engine and DAG cycle detection algorithm; demonstrates strong algorithmic and system design foundations for ML engineering roles.
- Tech:** React 18, TypeScript, @xyflow/react, Zustand, Tailwind CSS v4, Vite

CERTIFICATIONS

Machine Learning Specialization – Coursera	Data Analytics with Python – Coursera/NPTEL
Python (Advanced) – HackerRank	SQL for Data Science – Coursera
Python Programming – Infosys Springboard	Process Mining Fundamentals – Celonis Academy
